V. **Annex**

The following rules will apply to the combined lifesaving event:

The lifesaving competitions will embrace the following contests:

- combined lifesaving individual competition for female and male competitors
- combined lifesaving team competition for female and male competitors

The individual event in combined lifesaving will embrace the following exercises to take place in the following order:

- 50 m swimming, fully dressed
- 50 m diving/swimming, combined event
- 50 m rescue of a dummy

Only dummies and overalls approved by the organiser may be used.

Construction:

Dummies are to be constructed of PITET type plastic and must be hermetic (i.e.) capable of being filled with water and sealed for competition.

Height: The dummy shall be 1 m in height

Colour: The back of the dummies head must be painted in a colour contrasting with the rest of the dummy and with the water.

Transverse line: A transverse line of 15 cm is painted in a contrasting colour in the middle of the body (measured 40 cm from the bottom of the body to 55 cm in the direction of the head).

Each member union may enter up to four male/female competitors, respectively.

The final score will be determined by adding up the times achieved in the individual exercises. In the event of a competitor not finishing or being suspended from an individual exercise, the respective competitor will be disqualified from the overall competition. The competitors will only be allowed one attempt per exercise.

In the event of level time scores, the respective competitors will be awarded the same place.

As to the 50 m swimming, fully dressed, the swimmers will start in wet clothing in accordance with the FINA competition rules. The sleeves and the trousers may neither be rolled up nor be attached to the body by way of any additional aids. They are to reach the competitors' wrists or ankles, respectively.

The jacket is to be buttoned up by using the existing button holes.

The respective swimming stroke may be freely chosen; any change of stroke will be allowed. Timekeeping will start at the time the starting signal is given and end with the touch of the wall.

The garments to be worn by each swimmer comprise a pair of ankle-length trousers and a jacket with full-length sleeves (wrist length) which must be worn separately (no overalls).

It is neither permitted to roll up the jacket sleeves or the trouser legs nor to attach them to the body by any additional means.

The jacket must be buttoned up by using the existing button holes.

Regarding the diving/swimming combined event (25 m diving/25 m breaststroke) the start will take place in accordance with the FINA competition rules.

After the start, the competitors must cover the first 25m by diving. The stroke used during this diving may be chosen freely.

The body must remain completely under water throughout the entire dive. Should one part of the body visibly stick out of the water during the dive, the competitor will be disqualified.

Surfacing must take place in the surfacing zone. This surfacing zone is 5m long and starts after a distance of 25 m.

The place in which the head comes out of the water shall be decisive. The 25 m mark shall be indicated for each lane at the bottom of the pool for the male and female competitors to see and, in addition to that, the walls on both sides of the pool shall be marked along the entire surfacing zone.

After surfacing, the FINA competition rules governing the breaststroke will apply.

As to the 50 m rescue of a dummy, the start shall take place in accordance with the FINA competition rules. All dummies will be positioned at the bottom of the pool at a distance of 25 m from the start, with their heads pointing towards the starting block, all of them at the same distance and at the same depth. After the start, the competitors may either swim towards the dummy by using any stroke they like or by diving. Subsequently, the competitors shall get hold of the dummies under their armpits, with the faces of the latter pointing upwards and transport them back to the start wall. After taking hold of the dummy, the competitor may push him-/herself off the bottom of the pool one time. Thereupon, the distance is to be covered by swimming on the back. With the exception of the hands touching the start wall, both hands shall remain in constant contact with the dummy and must not be used in order to make any forward movement. Standing up or walking will not be admitted. Timekeeping shall start at the time the starting signal is given and end with the competitors touching the wall of the pool.

The team score in combined lifesaving will be determined by adding up the times scored by the 3 x 50 m relay team and the times scored by the individual members of the relay team in the individual competitions.

Teams with level times scores will be awarded the same place.

The lifesaving relay will embrace the following exercises:

- 1st Swimmer: 50 m rescue of a dummy
- 2nd Swimmer: 50 m lifesaving, combined event
- 3rd Swimmer: 50 m swimming, fully dressed

The competition rules applicable to the individual exercises will also apply to the individual distances forming part of the relay event.

The Competition Rules were approved by the 41st USPE Congress on 2nd November 2024 and entered into force on 1st January 2025.
